Education

BSc in Computer Science and Engineering

[Feb 2020 – July 2025]

Shahjalal University of Science and Technology (SUST), Sylhet

- **CGPA:** 3.71 / 4.00
- **Thesis:** *CyQured: Design, Development, and Empirical Evaluation of a Tabletop Game for Personal Cybersecurity Education*
 - Author: **Argha Pratim Saha**, Utsho Das
 - Supervisor: Dr. Farida Chowdhury, Dr. Md Sadek Ferdous, Md Masum.

Research Interests

Human-Computer Interaction (HCI) · Usable Security and Privacy · Human-Centered Cybersecurity · Security Education and Mental Models · Human-AI Interaction · AI Security & Privacy · Accessible Design · IoT Security

Publications

- CyQured: Design, Development, and Empirical Evaluation of a Tabletop Game for Personal Cybersecurity Education [\[link\]](#) [\[PDF\]](#)
USENIX Symposium on Usable Privacy and Security (SOUPS), 2026. [Aug 2026]
*Utsho Das**, **Argha Pratim Saha***, Md Sadek Ferdous, Md Masum, Farida Chowdhury
*Equal contribution.
- A Deep Learning Approach to Automate Classification of Arsenic-Affected Skin using EfficientNet-B1 [\[link\]](#) [\[PDF\]](#)
27th International Conference on Computer and Information Technology (ICCIT). [Dec 2024]
Argha Pratim Saha, Utsho Das, Shahidur Rahman
- Project PRIMUS at EHRSQL 2024: Text-to-SQL Generation using Large Language Models for EHR Analysis [\[link\]](#) [\[PDF\]](#)
6th Clinical Natural Language Processing Workshop, NAACL 2024, Mexico City. [June 2024]
Sourav Bhowmik Joy, Rohan Ahmed, Argha Pratim Saha, Partha Sarothi Bhowmik, Utsho Das, Minhaj Ahmed

Research Experience

- **Research Assistant (part-time), BRAC University, Dhaka** [Jan 2026 – Present]
Supervisor: Dr. Farida Chowdhury
 - Conducting research on how young adults in Bangladesh understand and respond to phishing and smishing, with a focus on designing interventions that do not assume prior security knowledge.
 - Mentoring undergraduate thesis groups on problem formulation, literature review, study design, and writing.
- **Undergraduate Thesis Research, SUST** [June 2024 – July 2025]
Supervisor: Dr. Farida Chowdhury, Dr. Md Sadek Ferdous, Md Masum.
 - CyQured: Designed a tabletop game that maps the STRIDE threat framework onto smart-home scenarios, enabling people without formal security training to reason about concrete cybersecurity threats.
 - Conducted a preliminary calibration study for the knowledge assessment, followed by a mixed-methods evaluation with 50 undergraduate participants.
 - Analyzed pre- and post-test results using linear mixed-effects models, finding significant gains in threat identification alongside positive usability outcomes.
- **Research Project, SUST** [May 2024 – Sept 2024]
 - Investigated deep learning approaches for automated classification of skin images affected by arsenic, comparing multiple lightweight models with deployment in resource-constrained and remote settings

in mind.

- Conducted model training, evaluation, and comparative analysis, resulting in a publication at ICCIT 2024.

Industry Experience

Associate Software Engineer, ShellBeeHaken Ltd., Dhaka

[Oct 2025 – Present]

- **KriyaKarak** | **Visit**: Built core front-end modules for an open marketplace for local creative services, including service-provider profiles and reservation workflows; conducted end-to-end usability testing and resolved critical functional and usability issues.
- **AI R&D**: Designed and developed a voice-first conversational AI agent for farmers and agricultural entrepreneurs in Bangla, supporting real-time conversational interaction, handling of interruptions, and multimodal text, audio, and video communication.
- Built the real-time communication infrastructure using WebSockets and implemented budget- and goal-based planning to support personalized interactions and task-oriented assistance.
- Developed a retrieval-augmented generation (RAG) pipeline grounded in a domain-specific knowledge base, incorporating safeguards against adversarial and unsafe inputs. Explored architectures for extending the system to low-connectivity, phone-based access for users in remote areas.

Problem Solving & Competitive Programming

Solved over 1,000 algorithmic problems across various automated evaluation judges (including LeetCode, Codeforces, LightOJ, HackerRank, HackerEarth, and VJudge).

- **LeetCode**: [bob_dylan](#) | *Contest Rating: 1900+ (5 Earned Badges, 360+ Problems Solved)*.
- **Codeforces**: [fugitive_stranger](#) | *Max Rating: 1419 (Specialist)*.
- ICPC Bangladesh Preliminary 2021.

Selected Projects

- **AutoScriber** [[GitHub](#)] [[Website](#)] – A transcription pipeline for qualitative HCI researchers working with Bengali interviews, supporting audio preprocessing, silence removal, and transcription through both local open-source models and cloud APIs with explicit privacy trade-offs. Designed to help researchers balance transcription accuracy with the privacy and ethical requirements of handling sensitive interview data. [*TypeScript, Node.js, CSS*].
- **git-user** [[GitHub](#)] [[npm](#)] – A cross-platform Go tool for switching between multiple Git identities and encrypted SSH keys, with passphrase-based encryption for stored credentials. Published on npm as **git-userhub**, with over 12,000 downloads in three months. [*Go, JavaScript*].

Technical Skills

- **Languages**: C/C++, Python, Go, JavaScript, TypeScript, Java
- **Web and systems**: React, Next.js, Node.js, Express, FastAPI, WebSockets, MySQL, MongoDB, Qdrant
- **Tools**: Git, L^AT_EX, Python statistical libraries

Leadership & Service

Human-Centered Computing Society (HCCS)

[Jan 2026 – Present]

BRAC University, Dhaka

Student Executive Team Co-Coordinator

[[website](#)]

- Coordinate research-focused seminars and activities, facilitate collaborative research ideation and team formation, and contribute to developing research guidelines.
